DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 11/3/2005 is acknowledged by the examiner.

Claim Objections

2. Claims 5, 7, and 8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims 5, 7, and 8 are not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear if the “portion” recited in claim 6 line 2 is different from the “portion” recited in claim 6 line 3.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, and 12 as well as 6 as far as it is definite, are rejected under 35 U.S.C. 102(b) as being anticipated by WO 96/11350 (Chatwin). Chatwin discloses a valve comprising a main

water channel (below element 3 in figure 1), an inflow (22), an outflow (23), a diaphragm (3), a pilot water channel including an inbranch (5) and an outbranch (15) on the same plane (figure 1), a moveable closure element (6, 10, 11, and 12) that moves linearly (there is a linear component to its movement in figure 1), magnetostatic forces (13), two closure parts (6, 10), permanent magnets (12), a portion (section of element 22 in figure 1), a second portion (below element 3 in figure 1), and a portion (portion of element 23 in figure 1).

Allowable Subject Matter

7. Claims 4, 9-11, and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
